About NTL

Established in 1998, NTL provides access to: Digital collections
Data services
Reference and research services
Networking

We are an **open access** digital repository.
All items are in the **public domain** and available for reuse **without restriction**.

The name **ROSA P** was chosen to honor the role that public transportation played in the civil rights movement and also one of the important figures, Rosa Parks.

Rosa Parks on a Montgomery bus on December 21, 1956, the day Montgomery's public transportation system was legally integrated.

Abstract

The National Transportation Library (NTL) was founded as an all-digital repository of US DOT research reports, technical publications and data products. NTL's primary public offering is ROSA P, the Repository and Open Science Access Portal. ROSA P is the full-text archive for the results of USDOT-funded research under its public access plan. Collections in ROSA P are available without restriction to transportation researchers, statistical organizations, the media, and the public. ROSA P makes NTL's digital collections findable and accessible to users, improves search and discovery, and links data to publications. Following the full implementation in January 2018, NTL added new collections, repaired documents, remediated metadata, and improved the user interface. Collections are accessible by Google, Google Scholar, WorldCat, Bing, TRID and Science.gov.

Age Versus Experience: Evaluation of Video Feedback Intervention for Newly Licensed Teen Drivers
Published: 2018-07-01
Abstract: Previous studies have shown that event-triggered, video-based interventions have the potential to improve driving safety among young drivers. Nine states including Iowa have have some type of restricted driving license that allows drivers younger than 16 ...

Repository Platform

. Open source CDC STACKS Platform (Islandora/Drupal/Fedora)
. Cloud storage that is stable and responsive
. Compliant with Open Archives Initiative Protocol for Metadata Harvesting (OAI-PMH)
. Self-governance using Open Archival Information System (OAIS) model
. Future compliance with CoreTrustSeal requirements for trustworthy repositories

Collections

- US Transportation Collection
- BTS Products
- Intelligent Transportation Systems Joint Program Office (ITSJPO)
- US DOT Public Access Data Management Plans
- FTA 50th Anniversary Collection
- NHTSA BSR
- Volpe National Transportation Systems Center Library
- Transportation Librarians Roundtable
- Federal Motor Carrier Safety Administration
- Federal Highway Administration
- Investigations of Aircraft Accidents 1934-1965

Future Enhancements

. More robust citation export
. "Canned" or saved searches with specific criteria that can be accessed directly
. Video files play in *ROSA P*
. New content and collections
